

Fabric Basket Class with Gene Pease

No Experience Necessary!

In about 4 hours, with no prior skill and very little preparation, you'll learn:

- Tools needed to make a basic coiled fabric basket
- Basics of coiled fabric basket construction
 - One or two fabric basket stitches
- How to finish a basic coiled fabric basket

By the time the class is finished, you will have created 1 coiled fabric basket about 3 inches wide x 4 inches tall with straight sides. No sewing with needle and thread, no machine or glue required!

Gene's fabric baskets are made the old fashioned way - with a twist. She covers a cordage with beautiful fabrics just like they did in the olden days. She also weaves the fabric in and around the coils just like they did in the olden days. No sewing machine, sewing needle, thread or glue is used in the making of these baskets. The new twist is that instead of cotton cordage or grass cordage, she uses plastic shopping bags! She stretches those ubiquitous bags out, rolls them up, then hides them so no one will ever see those bags again. She's hidden about 7,000 plastic bags in beautiful fabric baskets!

Gene's appreciation for textiles and creative talents include hand weaving, wet and needle felting, crochet, twining, cross stitch, ribbon and floss embroidery and the very old fashioned filet lace.

NEW CLASS: Saturday, May 21 • 10:00 a.m. to 2:00 p.m.

to be held in the Sautee Nacoochee Center Art Studio

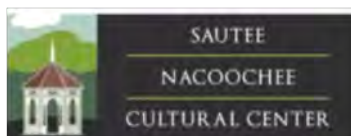

Fee: \$65 • All materials are supplied

Maximum number of students 8, minimum 2

Registration deadline: Wednesday, May 18 at 5 p.m.
